1. Qualitative Information on Consolidated Operating Results, etc. for the First Quarter

(1) Qualitative Information Concerning Consolidated Operating Results

During the first quarter of the consolidated fiscal year under review, the Japanese economy was severely affected by the COVID-19 new coronavirus pandemic that began in January 2020 and significantly worsened, suffering a decrease in domestic demand and a slowdown in exports resulting from sluggish economic activities. Although economic activities have been gradually recovering since the state of emergency declaration was lifted, the future outlook still remains uncertain. Overseas, the business environment surrounding the automobile industry, which is our main customer, faced a significant deceleration in car sales due to the impact of prolonged U.S.-China trade friction on the world economy and slowdowns in growth of the Chinese and Indian economies, together with the spread of COVID-19, which severely limited economic activity in many countries. In response to these rapid changes in the market environment, the Ahresty Group, while implementing measures to prevent the spread of COVID-19 in accordance with the local regulations of each country or region, took various emergency actions, such as full or partial suspension of operations and the revision of work shifts to adjust production systems in line with the substantial decline in sales volume, the utilization of idle internal facilities to reduce capital investment, and the prohibition in principle of business trips and the promotion of web conferencing to reduce costs. Despite these efforts, the severe impact of the rapid and substantial decline in sales volume resulted in a decrease in operating income both in Japan and overseas year on year.

Along with economic activities in various countries, production of our Group has been on a recovery trend after bottoming out in the consolidated first quarter under review, though uncertainties remain in the business environment. Under these circumstances, the Group will accelerate measures based on its 1921 Medium-term Management Plan, which we have promoted since fiscal 2019, to improve profitability by raising productivity through cost cutting and reduction of expenses.

Consequently, for the first quarter of the consolidated fiscal year under review, the Company recorded consolidated net sales of \$15,524 million (down 51.4% year on year), operating loss of \$3,020 million (as opposed to operating income of \$576 million for the first quarter of the previous year), recurring loss of \$2,589 million (as opposed to operating income of \$537 million for the first quarter of the previous year) and net loss attributable to owners of parent of \$3,190 million (as opposed to net income attributable to owners of parent of \$289 million in the first quarter of the previous year).

Operating results by segment are as follows:

(i) Die Casting Business: Japan

In the Japanese automobile market, car manufacturers, our main customers, and many other customers had to suspend operation or adjust production due to the impact of the spread of COVID-19. This affected the Company, leading to a substantial decrease in orders received. Net sales came to ¥7,232 million (down 52.2% year on year), partly due to the continuing decline in the conditions of the aluminum market. On the profitability side, the segment recorded a loss of ¥2,069 million (a segment loss of ¥29 million was recorded a year earlier) due mainly to the impact of the decrease in orders received. (ii) Die Casting Business: North America

In the automobile market in North America, suspension of operation at our major customers due to the spread of COVID-19 significantly affected orders received by the Company.

At our U.S. plant, major customers suspended operations one after another in response to the ongoing spread of the disease in the U.S., resulting in a significant decrease in orders received.

Meanwhile, the plant in Mexico, which settles its accounts in December, also faced a decrease in orders due to the impact of weak sales recorded by car manufacturers, the Company's main customers, together with the impact of the spread of COVID-19 starting from March.

Net sales came to $\frac{1}{4}$,742 million (down 47.5% year on year), due mainly to a significant decline in the condition of the aluminum market. On the profitability side, the segment recorded a loss of $\frac{1}{5}$ million (a segment profit of $\frac{1}{4}$ million was recorded a year earlier) due mainly to the impact of the decrease in orders received.

(iii) Die Casting Business: Asia

The plants in China, which settle their accounts in December, recorded a significant decline in both sales and production for automobiles due to the impact of the spread of COVID-19, associated with the lockdowns of some cities, the issuance of stayat-home orders and suspension of operation by car manufacturers, our main customers.

Our operation in India was also affected by the spread of COVID-19. The Indian government locked down the entire country to prevent infection, which forced our plant in India to suspend operation, resulting in a significant decline in orders received.

As a result, net sales came to $\pm 2,257$ million (down 61.1% year on year). On the profitability side, the segment recorded a loss of ± 995 million (a segment loss of ± 63 million was recorded a year earlier) due mainly to the impact of the decrease in orders received.

(iv) Aluminum Business

In the Aluminum business, sales weight decreased by 30.8% year on year due to the impact of the spread of COVID-19 infection. Reflecting also a lower unit sales price affected by the aluminum market, net sales decreased 37.0% year on year to ¥646 million. On the profitability side, the segment recorded a loss of ¥40 million (a segment profit of ¥67 million was recorded a year earlier) due mainly to the impact of the decrease in net sales.

(v) Proprietary Products Business

In the Proprietary Products business, net sales decreased 31.8% year on year to ¥644 million, mainly reflecting a decrease in orders for projects of the main customers, namely a clean room at a semiconductor-related company and a data center at a telecommunications company. On the profitability side, the segment profit increased 124.7% year on year to ¥108 million, chiefly due to reduction of selling, general and administrative expenses.

(2) Qualitative Information Concerning Consolidated Financial Position

Total assets at the end of the consolidated first quarter under review decreased \$2,852 million from the end of the previous consolidated fiscal year, to \$120,201 million. Current assets stood at \$33,709 million, a decrease of \$1,537 million from the end of the previous consolidated fiscal year. This was mainly due to a decline in trade notes and accounts receivable of \$7,399 million despite an increase of \$5,212 million in cash and time deposits. Fixed assets were \$86,491 million, down \$1,315 million from the end of the preceding fiscal year. This was due chiefly to a decrease of \$1,872 million in tangible fixed assets.

Liabilities at the end of the consolidated first quarter under review increased ± 626 million from the end of the previous consolidated fiscal year to $\pm 66,315$ million. Current liabilities stood at $\pm 41,585$ million, a decrease of $\pm 1,805$ million from the end of the previous consolidated fiscal year. The principal factors contributing to this result included an increase of $\pm 5,246$ million in short-term loans payable, in contrast to decreases of $\pm 5,046$ million in notes and accounts payable and ± 843 million in the current portion of long-term loans. Long-term liabilities stood at $\pm 24,730$ million, up $\pm 2,431$ million from the end of the preceding consolidated fiscal year. The main factors included an increase of $\pm 2,003$ million in long-term loans payable.

Net assets at the end of the consolidated first quarter under review decreased \$3,479 million from the end of the previous consolidated fiscal year, to \$53,885 million. This was attributable primarily to a decrease of \$3,190 million in retained earnings. As a result, the equity ratio was down from 46.5% at the end of the previous consolidated fiscal year to 44.7%.

(3) Explanation of Consolidated Earnings Forecasts and Other Information for Future Outlook

We announced the consolidated business forecasts and dividend projection for the year ending March 2021 as undetermined due to the global outbreak of the COVID-19 new coronavirus, which made it difficult to calculate reasonable figures at that time. However, as economic activities are being gradually resumed with the state of emergency being lifted and government regulations eased in various overseas countries where our Group operates, the Company has determined the forecasts based on the information and projections currently available and has decided to release them.

For details, please refer to Notice on Business Forecasts and Dividend Projection for the Year ending March 31, 2020 released today (August 6, 2020).

Please note that these forecasts have been prepared based on information and projections available as of the date of release of this material, and actual results may differ significantly from these forecasts due to various factors in the future.

(7) Important Subsequent Events

(Disposal of treasury stock for the delivery as stock compensation)

The Company resolved at its Board of Directors' meeting held on July 22, 2020 to dispose of treasury shares for the delivery as stock compensation ("the disposal of treasury stock").

1. Overview of the disposal (1) Deadline for disposal: August 7, 2020 (2) Type and number of shares to be disposed of: 156,541 shares of common stock of the Company 359 yen per share (3) Disposal value: (4) Total disposal amount: 56 million yen (5) Title and number of persons eligible for the allotment, and the number of shares to be allotted: Directors (excluding directors who are members of the Audit and Supervisory Committee) 5 persons 133,172 shares Directors who are members of the Audit and Supervisory Committee (excluding Independent Directors) 1 person 6,657 shares Executive Officers: 4 persons 16,712 shares (6) Others: Not applicable

2. Purpose and reason for the disposal

The Company resolved at its Board of Directors' meeting held on May 30, 2018 to introduce a restricted stock compensation plan ("the Plan") for the purpose of providing its Directors (excluding Independent Directors, "eligible Directors") and executive officers with an incentive to continuously improve the corporate value of Ahresty, facilitating their sense of shared values with shareholders and establishing greater linkage with medium- to long-term performance goals.

Under the Plan, at the Board of Directors' meeting held on July 22, 2020, the Company provided its eligible Directors and executive officers with monetary compensation receivables, and the eligible Directors and executive officers invested all the said monetary compensation receivables as their contribution in kind, thereby accepting the common shares to be allotted by the Company through the disposal of treasury stock.

3. Overview of the Plan

Eligible Directors and executive officers will invest all the monetary compensation receivables provided by the Company under the Plan as their contribution in kind, thereby accepting the issuance or disposal of common shares of the Company. The total number of common shares to be issued or disposed of by the Company for the eligible Directors shall be not more than 240,000 shares per year, and the per-share amount to be paid in shall be the closing price of the Company's common stock at the Tokyo Stock Exchange on the business day prior to the date of the Board of Directors' resolution (if no transactions occur on the day, the closing price of the most recent day of transaction).

For issuance or disposal of the Company's common stock under the Plan, the Company and the eligible Directors and executive officers shall enter into a restricted stock allotment agreement ("the Allotment Agreement"), which should include provisions to the effect that (i) the eligible Directors and executive officers shall not transfer, create a security interest in, or dispose of in any other way the common shares allotted to them under the Allotment Agreement for a specific period of time, and (ii) the Company shall acquire the said common shares free of charge if certain grounds arise.

On this occasion, according to the resolution made at the Board of Directors' meeting held on July 22, 2020, with the aim of promoting competent executive personnel taking into consideration the business performance of the Company, the degree of contribution by each eligible Director and executive officer, their scope of responsibilities and various other circumstances, and for the purpose of further raising the motivation of the eligible Directors and executive officers, it was decided to grant monetary compensation receivables of 56 million yen in total for 156,541 shares of common stock.
